### DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-7, 10-11, 15-19 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kobayashi et al.

Kobayashi et al disclose an optical recording medium comprising a substrate having pits formed thereon (lands/grooves), a recording layer, a dielectric sputter layer of SiO<sub>2</sub>, and an inorganic outer protective layer which flattens the surface of the medium. (See Figure 4 and col. 9, first full paragraph).

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-11, 13-22 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 4-6, 8, 10, 14, 19, and 32 of

Art Unit: 1774

compending Application No. 09/731,904. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim the same recording medium structure of a substrate having concavities and convexities, a recording layer, a dielectric layer, and a flattenable film where the layers are formed of the same materials in the same thickness, by the same method.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 2 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art cited disclose recording media having hard coats thereon.
